AFPL (Ceiling/Attic Mounts) MOTOR LIMIT SWITCH INSTRUCTIONS

To Increase Travel:

- 1st Run Motor in desired direction of travel
- 2nd Turn the adjustment screw “clockwise” until motor reaches desired stopping point

To Decrease Travel:

- 1st Run motor in opposite direction (backup)
- 2nd Turn adjustment screw “counter-clockwise”
- 3rd Run motor in desired direction and turn adjustment screw “clockwise”, if necessary, to reach the desired stopping point

Special Note:

DO NOT turn Limit Adjustment Screw “Counter-Clockwise” without **FIRST** running Motor in the opposite direction. Doing so will/can Damage the limit setting assembly and will require replacing the motor.

IMPORTANT:

Damage to the limit setting assembly is **NOT** covered by WARRANTY.
